Wheatcroft Garden Centre extended

The indoor area at Wheatcroft Garden Centre in Nottingham has been doubled by the addition of a brand new 24,000 sq ft extension. As planned, this was ready in time for the unveiling of this year's Christmas ranges - see the attached photo.

There is already strong local public and press interest with increasing numbers of customers attracted by the many displays. Yet to come are the arrival of Santa by helicopter and the opening of a further new planteria building which will give even more covered shopping space.
