

## **NWF GROUP PLC CONTRACT WITH TYPHOO TEA LIMITED**

NWF Group plc ("NWF"), the diversified sales and distribution company, is pleased to announce that its grocery distribution business Boughey Distribution has won a significant contract to provide logistics services to Typhoo Tea Limited, for the storage and distribution of its finished goods throughout the UK and overseas.

Typhoo's products will be accommodated in Boughey's Deeside warehouse. Space was recently made available by the loss of business through acquisition of HP Foods, whose warehousing and distribution was taken in-house by their new owners Heinz. Over the next few months Boughey and Typhoo will undertake systems integration and testing, with stock building during April and May prior to full scale distribution from 1 June.

Commenting on the news Graham Scott, Chief Executive of NWF, said: "This is excellent news. It is a testament to the operational excellence of Boughey that our distribution division will return promptly to fully occupied status with such a well recognised and national brand as Typhoo."

Keith Forster, Managing Director of Boughey, added: "We are delighted to have been given the opportunity to offer the benefits of Boughey's consolidation expertise to such a well-known and respected brand. This move will restore the utilisation of Deeside to its previous level in advance of bringing other new and existing customers into the major warehouse development currently progressing well at Wardle."
